FAST FACTS

Communities and Industries that partner together, thrive together!

HOSHIZAKI is the world leader in the design, manufacturing, and marketing of a wide range of products for the foodservice industry including ice machines, refrigerators, freezers, prep tables, display cases and dispensers.

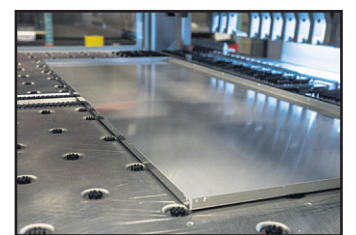

In 1986 the North American headquarters and ice machine production plant was established in Peachtree City, GA and by 2000 had grown dramatically and therefore constructed an additional manufacturing facility in Griffin to produce commercial refrigeration products and finished goods storage.

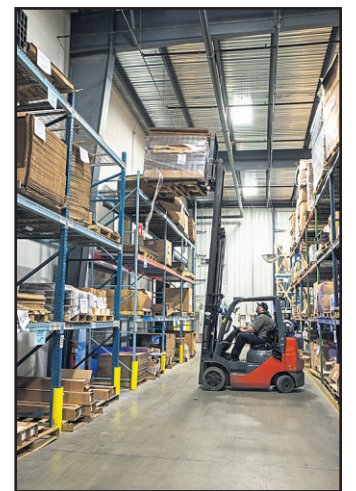

Hoshizaki Steelheart Series is a full line-up of commercial refrigeration equipment with stainless steel inside and out and R290 environmentally friendly refrigerant.

Hoshizaki America is proud of our dedication to quality, innovation, and reliability.

Our leadership focuses on building strength through communication and transparency while staying compliant in a collaborative environment. The family-like culture allows our employees to thrive, and the excellent benefits take care of them and their families.

SPALDING COUNTY COMMUNITY ACTIVITIES:

Long time annual donor to five loaves two fish food pantry, and participation in Boy Scouts of America, March of Dimes, and multiple local charities around the Griffin Area.

The Griffin Spalding Development Authority is focused on sustainability from two perspectives...environmental and economic. We certainly want our Park and its resident companies to be able to utilize needed natural resources while at the same time preserving those same resources for future generations. The Lakes at Green Valley is the only known Eco Park in the Southeast whose focus is on sustainability of environmental resources. This is accomplished during site development and building construction through standards developed within our Sustainability Checklist...so the process is truly a collaboration of both the resident companies and the Griffin Spalding Development Authority. In addition to the environment, the Griffin Spalding Development Authority also focuses on economic resources such as workforce development and job training using entities such as Georgia QuickStart, Griffin Area College and Career Academy, Southern Crescent Technical College, our local public and private schools and others. Griffin Spalding Development Authority hopes the jobs we have today will be sustainable with the changing and improving of those jobs for future generations.

LOCATION. OPPORTUNITY. GROWTH.
