

# INDUSTRY SPOTLIGHT

## A LEGACY OF INNOVATION AND LOCAL GROWTH IN GEORGIA

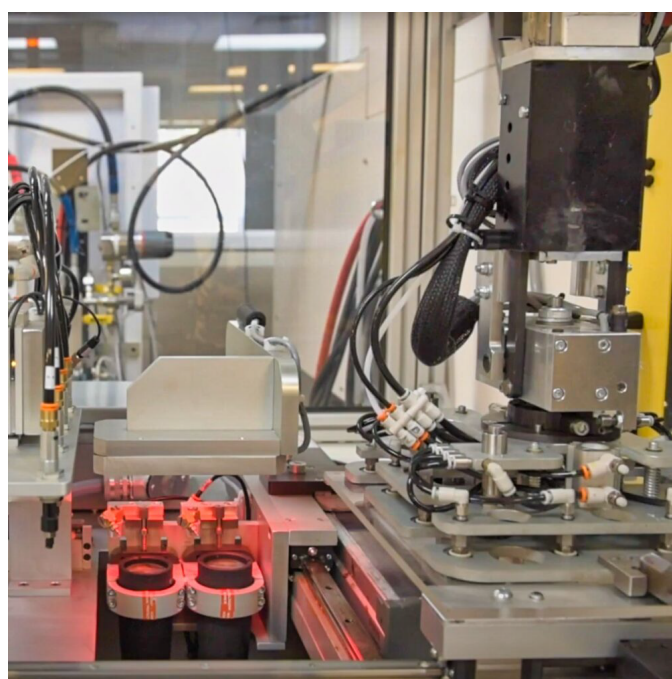

Established in 1935, Vernay has become synonymous with problem-solving in flow control solutions. With a culture of innovation, Vernay is a trusted provider of flow control solutions for leading OEMs and emerging companies across the Automotive, Medical and Specialty sectors. Vernay's components are integral to daily activities, so you will often hear our team members say, "Vernay Every Day."

Vernay's Griffin manufacturing facility is located at 804 Greenbelt Parkway.

### GLOBAL RESOURCES, LOCAL TOUCH

While a global company, Vernay maintains a strong local presence, supporting communities across the United States, Italy, the Netherlands, and China. Operating strategically, Vernay positions engineering, testing, manufacturing, sales, and support capabilities worldwide. In Georgia, Vernay is not just a distant corporation; it actively contributes to Griffin and Milledgeville's local community and economy. Expanding with a new facility in development in Kennesaw, GA, Vernay is investing in its future within the local community, emphasizing growth and innovation in Georgia.

Vernay is committed to staying at the leading edge of advanced technology.

Part of the Griffin community since 1979, Vernay's current Griffin facility spans 35,000 square feet and employs over 200 team members. Actively involved in local events and organizations, Vernay contributes to the Spalding County Chamber of Commerce and Industry Roundtable and supports initiatives like the Mechatronics apprenticeship program. The Griffin location served as a collection point for relief supplies after the January 2023 tornado and supports local causes like the Student Closet for Beaver Brook Elementary.

### EMPLOYMENT OPPORTUNITIES

Join us **Saturday, January 27, 2024**, as Vernay hosts a Job Fair at our Griffin facility, located at 804 Greenbelt Parkway, Griffin, GA 30223, from **10:00 a.m. to 2:00 p.m.**

Look no further if you seek a full-time, ground-floor opportunity with a respected, stable, and innovative company. Our Production Operators are indeed the heart of our company. You will be involved in various manufacturing duties, including mixing, molding, finishing, assembly, audits, and inspection. This role offers progressive pay levels, opportunities for growth within the company, medical insurance (including dental and vision), 401k with a company match, 96 hours of paid holidays, and 80 hours of paid vacation.

If you know someone searching for employment, please extend this invitation to them. Candidates must have a high school diploma or GED and bring two forms of identification (Passport, Driver's License, Social Security Card, or Birth Certificate) and two copies of their resume.

### CONTINUED COMMITMENT

Heading into their 45th year in Griffin, Vernay looks forward to continued contributions to the community. For more information on Vernay, employment opportunities, and local initiatives, visit [www.vernay.com](http://www.vernay.com).

### VERNAY

The Griffin Spalding Development Authority is focused on sustainability from two perspectives...environmental and economic. We certainly want our Park and its resident companies to be able to utilize needed natural resources while at the same time preserving those same resources for future generations. The Lakes at Green Valley is the only known Eco Park in the Southeast whose focus is on sustainability of environmental resources. This is accomplished during site development and building construction through standards developed within our Sustainability Checklist...so the process is truly a collaboration of both the resident companies and the Griffin Spalding Development Authority. In addition to the environment, the Griffin Spalding Development Authority also focuses on economic resources such as workforce development and job training using entities such as Georgia QuickStart, Griffin Area College and Career Academy, Southern Crescent Technical College, our local public and private schools and others. Griffin Spalding Development Authority hopes the jobs we have today will be sustainable with the changing and improving of those jobs for future generations.

# LOCATION. OPPORTUNITY. GROWTH.
